

SPORTS MATTING

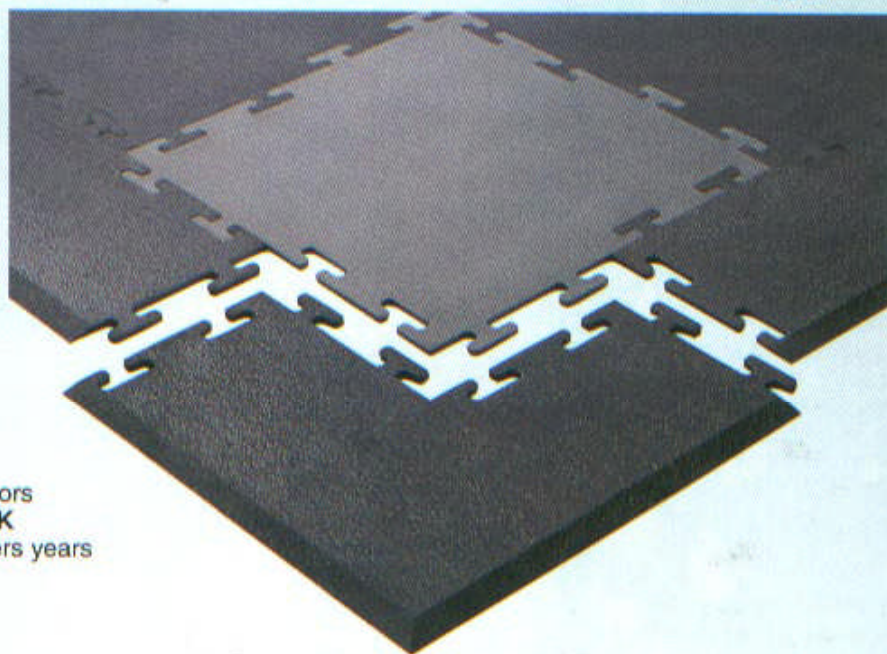

TILE LOCK FOR WEIGHT LIFTING AND OTHER GYMNASIUM ACTIVITIES. . .

TILE LOCK is a durable solid rubber interlocking floor system designed to absorb shock and noise of heavy gym equipment. It provides protection, especially from dropped free-weights. The pebbled surface adds traction, a key benefit for weight training athletes. **TILE LOCK** may also be used in work areas and under ice skates. Not suitable for use outdoors or under golf spike shoes. **TILE LOCK** will not crack, tear or wrinkle and offers years of lasting protection.

NOT GREASE RESISTANT.

- Safety bevel edge.
- Easy installation and removal - No cementing required.
- Fits any area - Outside dimensions of area to be covered must be divisible by two feet when using standard sections. Product may be custom cut to fit any application.
- Low maintenance- Cleans easily with soap and water.
