Diamond Plate/Knob Back™ Anti-Fatigue Mats

Black Yellow

Black

Gray Yellow

Grayl

- The comfort and durability of Diamond Plate Anti-Fatigue matting in a configuration that makes it suitable for wet area applications, areas that were previously restricted to the traditional molded products with their marginal anti-fatigue performance.
- This new Diamond Plate/Knob Black Anti-Fatigue matting is self-extinguishing, nonflammable, and chemical resistant.
- Diamond Plate/Knob Black has a 5/32" thick diamond plate surface permanently bonded to your choice of a 3/8" or 3/4" thick resilient closed cell polymeric sponge base.
- The knob black is permanently bonded to the diamond plate surface creating a sealed envelope that totally encapsulates the sponge core.
- The Diamond Plate/knob Black matting is available in two styles. The heavy-duty style is 3/4" thick and the super-duty is 1 1/8" thick.
- All edges are beveled and sealed for safety and durability.
- There are four different surface colors to choose from.
- 2 year warranty.
