MULTI-LOCK TILE

COVERDECK SYSTEMS® MULTI-LOCK interlocking PVC tile system offers a first rate solution for a modular and functional floor covering. Manufactured from rugged and resilient PVC, **MULTI-LOCK** is an injection molded solid vinyl tile. The modular system quickly restores and enhances the surface appearance hiding unsightly cracks or stains in the floor below.

The interlocking floor system allows for quick and easy installation requiring no special tools or adhesives. **COVERDECK SYSTEMS® MULTI-LOCK TILES** are resistant to most harsh chemicals and solvents and provide exceptional durability in high foot traffic (3/16" thickness) or heavy load situations (5/16" thickness). The larger size to the tiles 19-5/8" x 19-5/8" allows for fewer seams. The 5/16" thickness tile has a unique ribbed bottom which gives our tile additional gripping feature when installed on a smooth surface. The **MULTI-LOCK TILES** provide an anti-fatigue surface and reduce cold vapor diffusion making a more comfortable work area.

MULTI-LOCK TILES are available in two surfaces; Coin; a standard raised medallion motif and Matte; a flat surface with an "orange peel" texture. **MULTI-LOCK TILES** are available in a wide variety of colors making attractive and distinctive designs easy! **RAMP EDGING** in matching colors is available for entrance ways & edge finishing.

FEATURES:

- Extremely hard wearing, resilient and durable
- Resistant to most solvents and chemicals
- Reduces damage caused by impact, abrasion or vibration.
- Installation is a SNAP
