ALUMINUM RECESS FRAME FOR NEW CONSTRUCTION

Mill finish Aluminum **RECESS FRAMES** for use in new construction, provide a recessed area to receive the mat. The frame is installed by the cement contractor when concrete is poured. The cement finisher can use the projection on the frame for screeding purposes, insuring a perfectly flat surface for the mat. Concrete anchor pins are furnished for 18" O.C. spacing. Extrusions are furnished cut and mitered, ready for assembly on the job.

Combination
Corner Pin/Anchor
