How to Clean Salon Mats

Cleaning Beauty Salon Mats:

Be assured we do not sell cleaner for salon mats. CWF Flooring, Inc. salon floor mats requires little to zero maintenance.

Most spills of coffee, tea and soft drinks should be cleaned up before the spill dries. Clean with very warm water and a towel or mop.

More serious stains can be cleaned with detergents. Make sure the detergent is sponged up well with a water drenched mop or sponge. We don't want the chemical to affect the mat surface.

Spot clean with a vacuum without the carpet mode. In other words, only use the suction and do not use the roller brush mode on the vacuum. The vacuum roller may scratch the salon mat.

Please call CWF Flooring, Inc. for more information.
